ARSHAD KHAN

Azure Data Engineer | Azure Databricks | PySpark | Python | SQL
India | +91 8755752798 | arshadkhancse71@gmail.com | LinkedIn: linkedin.com/in/arshad-khan-33691718b
Databricks Certified Data Engineer Associate | Microsoft Certified: Azure Data Fundamentals (DP-900)

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of IT experience specializing in Azure Databricks, PySpark, Python, and SQL. Hands-on experience building enterprise Lakehouse solutions using Azure Data Factory, ADLS Gen2, Delta Lake, and Medallion Architecture. Skilled in ETL development, production support, data validation, Spark optimization, and designing analytics-ready data models for business reporting.

TECHNICAL SKILLS

Python • SQL • PySpark • Azure Databricks • Azure Data Factory • Azure Data Lake Storage Gen2 • Delta Lake • Delta Live Tables • Databricks Autoloader • Apache Spark • Spark Structured Streaming • Star Schema • ETL/ELT • Git • GitHub • Lakehouse Architecture

PROFESSIONAL EXPERIENCE

Associate | Cognizant (Dec 2023 – Present)

- Developed and supported ETL pipelines using Azure Databricks, PySpark, Python, and SQL.
- Performed production support, incident analysis, debugging, and root cause analysis for enterprise data pipelines.
- Developed scalable data transformation workflows using Delta Lake following the Medallion (Bronze, Silver, Gold) architecture.
- Implemented data quality validation, reconciliation checks, and SQL-based verification to improve pipeline reliability.
- Optimized Spark workloads using partitioning, caching, and efficient DataFrame transformations.
- Collaborated with cross-functional teams using Git and Agile development practices.

ENTERPRISE AZURE DATABRICKS LAKEHOUSE PROJECT

Tech Stack: Azure Data Factory, Azure Databricks, ADLS Gen2, PySpark, SQL, Delta Lake, Delta Live Tables, Databricks Autoloader, Git

- Designed and implemented an end-to-end Azure Lakehouse platform using the Medallion (Bronze, Silver, Gold) architecture.
- Automated ingestion from Azure SQL into ADLS Gen2 using Azure Data Factory and Databricks Autoloader.
- Developed reusable PySpark notebooks to transform raw data into analytics-ready Delta tables.
- Implemented Delta Live Tables to automate ETL pipelines with built-in data quality checks.
- Designed Star Schema (Fact and Dimension tables) for business reporting and analytics.
- Applied Spark optimization techniques including partitioning and caching to improve ETL performance.
- Managed source code using Git and followed CI/CD-ready development practices.

CERTIFICATIONS

• Databricks Certified Data Engineer Associate
• Microsoft Certified: Azure Data Fundamentals (DP-900)

EDUCATION

Bachelor of Technology (Computer Science Engineering) | MIET Meerut | CGPA: 8.0/10
